

For the second time, the **CON.THERA specialist conference for interdisciplinary training in the field of neurorehabilitation** took place parallel to REHAB in 2023.

For more than 40 years, REHAB has been a firm fixture in the industry's timetable and has established itself as **THE most important platform for high-quality mobility aids** and children's aids from Germany and other European countries every second year. Around 12,000 professional and private visitors came to Karlsruhe in 2023 to receive personal advice and find out about current trends and the latest aids and therapies.

In order to promote the **integration of the professional groups involved in therapeutic care** both self-employed and employed physiotherapists, occupational therapists, sports therapists and speech therapists received **interdisciplinary training at the conference**.

FOCUS
NEUROREHABILITATION

” The combination of a practice- and product-oriented trade fair with a scientific programme that addresses the current state of knowledge for various aspects of rehabilitation is informative and profitable for the participants. The number of exhibitors promises an excellent overview of both established and innovative new products “

Professor Joachim Liepert
Speaker
CON.THERA
